

# MarinTrust Improver Programme: NE Atlantic Blue Whiting Milestone Report End Year 2

This document focus on the milestones that make up the Fishery Action Plan (FAP) as part of the Fishery Improvement Project (FIP) aligned to the MarinTrust Assessment criteria.

<b>FIP name</b>	NE Atlantic Blue Whiting
<b>Milestone</b>	Year 2
<b>Management authority (Country/State)</b>	The North East Atlantic Fisheries Commission (NEAFC). The European Union and the fisheries ministries of Faroe Islands, Iceland, Norway and the UK
<b>Date</b>	September 25th, 2023
<b>Developed by</b>	Neil Auchterlonie, NAPA Project/Policy Lead

<b>Outcome of Assessment</b>	
<b>Milestone</b>	Year 2
<b>Sections with milestones</b>	A-3 Harvest strategies
<b>Date</b>	September 25th, 2023
<b>Developed by</b>	Neil Auchterlonie, NAPA Project/Policy Lead

## Background

The North Atlantic Pelagic Advocacy Group (NAPA) launched the market-led approach to improving North Atlantic pelagic fisheries management in June 2021. Currently NAPA has 73 members including seafood retail and processing businesses, as well as trade and industry bodies and environmental NGOs. The reach of NAPA is worldwide as the partners are located across the globe. NAPA’s activities are focused on advocacy and influence to secure long-term, science-based management of the North East Atlantic

pelagic stocks: for prospering oceans, fisheries, and business security

<https://napafisheries.org/>. The MarinTrust FIP operates alongside another FIP which covers the species Atlantic mackerel and Atlanto-Scandian herring, and for which the FAP shows overlap. Byproducts from those species are also used for fish meal and fish oil (FMFO) production. Please note that some of the evidence provided also includes reference to these products.

As a first step for the Blue whiting FIP, the partners evaluated the fishery against the MarinTrust standard in 2021, which provided the basis for the fishery action plan (FAP), and the FIP commenced in October 2021. The first annual report was produced for MarinTrust in October 2022. This report updates MarinTrust on progress made over year 2 of the FIP.

The named Project lead (FIP Coordinator) on the NAPA FIP, Dr Tom Pickerell, moved on from his role in April 2023, and there was a short gap of two months before his successor, Dr Neil Auchterlonie, took on this role in June 2023. There was, therefore, a slight break in activities over this time within the reporting period.

## Details on species designations

The fishery catch composition is mostly blue whiting, with 98% or more of the catch caught with pelagic gears. Therefore, it was considered that blue whiting is the only Type 1 species caught in the fishery and was assessed under Category A.

The catch composition data for purse seines indicated that the catch is effectively 100% blue whiting. EU & UK reports indicated no other species making up 0.1% or more of the catch with any pelagic trawl gears. Faroese and Norwegian reports did indicate the possible presence of Type 2 species in small quantities, which are listed below:

- Herring (*Clupea harengus*) – Norwegian spring-spawning – Category C
- Mackerel (*Scomber scombrus*) – North East Atlantic – Category C
- Norway pout (*Trisopterus esmarkii*) – North East Atlantic – Category C
- Saithe (*Pollachius virens*) – Faroes and North Sea stocks – Category C
- Lesser silver smelt (*Argentina sphyraena*) – North East Atlantic – Category D

## Gap Analysis and Improvement actions

The assessment and gap analysis identified the need to improve the factor **A-3 – Harvest Strategy. In particular, A3.2:**

*“Total fishery removals of this species do not regularly exceed the level indicated or stated in the stock assessment. Where a specific quantity of removals is recommended, the actual*

*removals may exceed this by up to 10% ONLY if the stock status is above the limit reference point or proxy”.*

The FAP included four actions aiming to fulfil this gap:

1. Engagement with fisheries management decision makers to Ensure Robust Harvest Strategies are adopted and implemented;
2. Dispute settlement legal framework and consultation processes;
3. Effective decision-making processes;
4. Ensure Key Data Elements (KDE) information is collected on vessels supplying MarinTrust factories.

This report reviews the status of the implementation of those actions.

## IP Milestone report

Use the below tables to provide an update on actions in the Fishery Action Plan, with links to relevant evidence documents. Additional lines may be added where necessary.

### M – Management Framework and Surveillance, Control and Enforcement

MT clause (if relevant)	Action in plan	Action update	Progress against milestones	Outstanding actions and rationale	Evidence	Status of action
N / A						

### Category A: Data Collection, Stock Assessment, Harvest Strategy, and Stock Status

#### A-3 Harvest Strategy - Minimum Requirements

--	--	--	--	--	--	--

	<p>2. Dispute settlement legal framework and consultation processes</p>	<p>NAPA released a document with a series of recommendations that include the urgency to agree and implement an allocation mechanism for the NE Atlantic mackerel, Atlanto-Scandian herring and blue whiting; to adopt NEAFC Guidelines for Coastal State Consultations in the NE Atlantic in their discussions, and consider a cap on catching in international waters to constrain further overfishing. The document has been the main tool for conversations with coastal states to motivate support on this endeavour.</p>	<p>M 2.1 NAPA reviews and produces a document summarizing the coastal states' and NEAFC's dispute settlement protocols.</p> <p>M 2.2 Lobby a coastal state (i.e., UK) to initiate negotiations for a mechanism, for cooperation and dispute resolution between the Coastal States which is effective in agreeing an appropriate management mechanism consistent with the management plan.</p>	<p>M2.1. NAPA has produced a draft dispute settlement document referencing an EU Proposal for an amendment to the NEAFC Convention that is yet to be adopted. This will be further developed in 23/24.</p> <p>M2.2. NAPA produced a Summary, Position statement and analysis of the 2022 advised TAC allocations, updating the 2020 and 2021 figures.</p>	<p>Draft NEAFC Dispute Settlement document attached.</p> <p>Summary, Position statement and analysis paper attached.</p>	<p>Ongoing</p>
--	---	--	---	---	--	----------------

	<p>3. Effective decision-making processes</p>	<p>NAPA has been actively using different channels to promote the importance of improving the decision-making process. From publicly identifying the interest from different countries and companies that supply from the fishery. To continue lobbying with coastal representatives about the market benefits of pursuing these new mechanisms.</p>	<p>M 3.1 During negotiations for TACs and sharing arrangements, arrange meetings with the catching sector (“roundtable”) to encourage a more precautionary management solution.</p> <p>Communication to continue with Coastal States representatives to promote responsive and precautionary decision-making, particularly regarding TACs.</p>	<p>Reference to mackerel campaign 2022 which has read-across to actions on the NAPA FIP (the first 3 actions of the NAPA FIP are common to the mackerel/herring FIP). There were unfortunately divergent views on the TAC level, with the UK supporting a TAC constraint principle. The UK were keen to set a TAC for blue whiting that was below the ICES advice. NAPA heard that the Heads of Delegation had been receiving letters from NAPA Partners, and this was having an impact.</p> <p>Prior to the 2023 negotiations, NAPA published a social media short film (September 2023) and released a statement.</p>	<p>2023 Campaign strategy document attached.</p> <p>Link on Twitter to 2023 film.  <a href="https://x.com/NAPAFisheries/status/1708747758759223318?s=20">https://x.com/NAPAFisheries/status/1708747758759223318?s=20</a></p> <p>Position paper and Coastal state meetings’ summary paper attached.</p>	<p>Ongoing</p>

A3	A3.1	Projected						No significant changes to rescored this indicator

	Actual						
A3.2	Projected						<p>Despite the efforts, commitments and discussions made by NAPA and NAPA Partners, there is still work to be done to reach agreement on TAC allocations for this stock and the milestone is behind schedule. Work on the Action #4 (Key Data Elements) was planned to commence in Year 3., and work on this Action is just starting. Summaries for the other work:</p> <p>For the Coastal State Negotiations:</p> <ul style="list-style-type: none"> <li>• There were divergent views on the TAC level, with the UK supporting a TAC constraint principle.</li> <li>• Parties agreed to reconvene to continue discussions on the TAC for blue whiting before the NEAFC meeting</li> </ul> <p>For the NEAFC discussions:</p> <ul style="list-style-type: none"> <li>• Discussions on a total allowable catch for blue whiting were ongoing.</li> <li>• Measures were adopted for blue whiting in the NEAFC Regulatory Area (international waters) in 2023.</li> <li>• These measures reflect the outcomes of Coastal State consultations and prevent countries who are not Coastal States or fishing parties accessing these stocks.</li> </ul> <p>NAPA has continued to engage with the CSs and NEAFC in 2023. Work on KDEs action is just commencing (October 2023). As noted above this FIP is at an important juncture and the future of the FIP will be discussed at a meeting of the Steering Committee (and stakeholders) in London in November 2023. In the meantime work will continue on the 4 Actions in the FAP, but there may be some requirement to apply for an extension to this FIP from 2024 onwards, given the timing of the FIP and the lack of synchronicity with the CS Negotiation process and NEAFC Discussions.</p>

### Additional Information

The following section highlights any information provided by the fishery in support of this Milestone Report which does not relate directly to any of the Milestones above, but which is relevant to the ongoing monitoring of fishery management status.

Given the disappointing lack of progress seen with this FIP, the NAPA Secretariat is organising a meeting of the Steering Committee, and other stakeholders to discuss the implications and mechanics of applying for an extension to the original 3-year FAP. MarinTrust has also been invited to this meeting. This meeting will be held in London on the 7<sup>th</sup> November as an in-person event. NAPA understands that the current timeline for the FIP is challenging.

### Amended timeline

The following section allows the applicant to explain if there are any amendments to the improvement timelines and provide the reasons and evidence for this.

The timeline is under review, per the text above. Significant progress is possible, but unfortunately unlikely in early 2024, so NAPA will re-assess the relevance of the FIP in Q423/Q124.
